### **Claim for Priority**

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/909,137, filed on August 11, 1997.

### **Claim Rejections - 35 USC § 102**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 15, 28, and 39 are rejected under 35 U.S.C. § 102(e) as being anticipated by Bessho, 5,898,795.

For claim 15, a ruled line extracting apparatus is provided by Bessho in at least the abstract. A straight line extracting means for extracting information of one or more straight line patterns from an input image is provided by Bessho in at least Fig. 2, block 10, or Fig. 3, block 20, providing for an input image, and at least the paragraph bridging cols. 8-9, and the first three full paragraphs in c. 9, and at least Figs. 4-5, 7-12, 13B, and 15, where extracting is explicitly provided by Bessho. Straight line deleting means for determining whether or not to delete one among the one or more straight line patterns by using at least one of information about a shape of the one among the one or more straight line patterns, and information about a distance between two straight line

patterns included in the one or more straight line patterns is provided by Bessho in at least the first two full paragraphs in c. 11 by shape and distance, and alternately in the first two full paragraphs in c. 12.

For claims 28 and 39, see the rejection of at least claim 14. See also c. 6, lines 49-53, for a computer readable medium implementation.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 15, 28, and 39 are rejected under 35 U.S.C. § 102(b) as being anticipated by Wang, 5,307,422.

For claim 15, ruled line extracting comprising straight line extracting means for extracting information of one or more straight line patterns from an input image is provided by Wang in at least c. 5, lines 15-50 and lines 65-68, by extracting information of units, which can consist of border lines considered as ruled lines, and inputs an image by at least block 12 in Fig. 1. A straight line deleting means for determining whether or not to delete one among the one or more straight line patterns by using at least one of information about a shape of the one among the one or more straight line patterns, and information about a distance between two straight line patterns included in the one or more straight line patterns is provided by Wang in at least c. 5, line 30 – c. 6,

Art Unit: 2625

line 10, where units are generally based on different shapes, which correspond to Applicant's straight line shapes.

For claims 28 and 39, see the rejection of at least claim 15, and see Wang in at least the paragraph bridging cols. 4-5, where his invention can be implemented in either hardware or software.
